Assert.js v1.0.1 cheatsheet - https://github.com/Serrin/assert.js

Category	Assertion
Constants	assert.VERSION;
Errors	assert.AssertionError
Basic	<pre>assert(condition, [message: string Error]); assert.ok(condition, [message: string Error]); assert.notOk(condition, [message: string Error]); assert.fail([message: string Error]);</pre>
Equality	<pre>assert.equal(actual, expected, [message: string Error]); assert.notEqual(actual, expected, [message: string Error]); assert.strictEqual(actual, expected, [message: string Error]); assert.notStrictEqual(actual, expected, [message: string Error]); assert.deepEqual(actual, expected, [message: string Error]); assert.notDeepEqual(actual, expected, [message: string Error]);</pre>
Exceptions	<pre>assert.throws(fn, [ErrorType string RegExp], [message: string Error]): Promise; await assert.rejects(asyncFnOrPromise, [ErrorType string RegExp], [message: string Error]); await assert.doesNotReject(asyncFnOrPromise, [ErrorType string RegExp], [message: string Error]);</pre>
Boolean	assert.isTrue(value, [message: string Error]); assert.isFalse(value, [message: string Error]);
Туре	<pre>assert.is(value, expectedType, [message: string Error]); assert.isNot(value, expectedType, [message: string Error]); assert.isNullish(value, [message: string Error]); assert.isNotNullish(value, [message: string Error]);</pre>
String	<pre>assert.match(string, regexp, [message: string Error]); assert.doesNotMatch(string, regexp, [message: string Error]); assert.stringContains(actual, substring, [message: string Error]); assert.stringNotContains(actual, substring, [message: string Error]);</pre>
Comparison	<pre>assert.lt(value1, value2, [message: string Error]); assert.lte(value1, value2, [message: string Error]); assert.gt(value1, value2, [message: string Error]); assert.gte(value1, value2, [message: string Error]);</pre>
Objects	assert.includes(container, options: {keyOrValue, [value] }, [message: string Error]); assert.doesNotInclude(container, options: {keyOrValue, [value] }, [message: string Error]);
Testrunner	<pre>assert.testSync(block): { ok: true; value: any } { ok: false; error: Error } await assert.testAsync(block): { ok: true; value: any } { ok: false; error: Error } assert.testCheck(result: { ok: true; value: any } { ok: false; error: Error }): result.ok is true</pre>
